Office Action Summary

Application No.

10/573,807

Applicant(s)

WAUTIER ET AL.

Examiner

Jeffrey C. Mullis

Art Unit

1796

Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 July 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 50-65 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 50-65 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-946)
- 3) ☐ Information Disclosure Statement(s) (PTO/SF/ICE)
- 4) ☐ Interview Summary (PTO-413)
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____
- Paper No(s)/Mail Date _____

Paragraph 131 of applicants published specification refers to Priex 25050 as well as Priex 125050 as though they are identical and this therefore appears to be a misprint. Correction or explanation is required.

Claims 50-65 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the specific blends of the Examples, does not reasonably provide enablement for blends or processes of improving properties for blends other than the specific blends of the examples. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. Note paragraph 7 of applicants published specification where it is disclosed that it is "entirely surprising" that a synergistic effect could be obtained and that properties of the resulting blend could be improved relative to the components. It is noted that such a process in which improved properties relative to the components is actually claimed despite the fact that no disclosure regarding how the "judicious choice" of polypropylenes are to be made except of course specific tradenamed materials are used in applicants Examples. Note also paragraph 5 of applicants' published specification which discloses that prior art methods in which modified and unmodified polyolefins are blended fail to achieve applicants' limitations of improved characteristics relative to the components used. Nonetheless applicants specification discloses nothing regarding their process except modified and unmodified polyolefins are blended and it is not clear how the process of applicants specification differs from that of for instance GB 1335791 (numerous other prior art references disclosing the blending of modified and

unmodified polypropylenes or polyolefins) discussed at paragraph 5 of applicants specification except for use of the specific tradenamed material of the specification and it is therefore not clear how the characteristics of the claims are to be achieved except for use of the specific materials of the examples.

It is not the position of the Examiner that use of tradenames in the claims would be acceptable.

Claims 50-65 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "low" is subjective and therefore unclear.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 50-65 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ding et al. (US 2002/0107329).

It is noted that the only actual process step recited by the instant claims is adding an unmodified polyolefin to a modified one such as is taught by paragraph 93 of the reference. Note Table 1 on page 10 where the blended maleic anhydride modified polyolefin with polyolefin in for instance Example 3 has improved tensile strength as compared to comparative example 1 with no polypropylene.

When the reference discloses all the limitations of a claim except a property or function, and the Examiner cannot determine whether or not the reference inherently possesses properties which anticipate or render obvious the claimed invention, basis exists for shifting the burden of proof to applicant. Note In re Fitzgerald et al., 619 F. 2d 67, 70, 205 USPQ 594, 596, (CCPA 1980). See MPEP § 2112-2112.02.

Claims 50-65 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over VanBrederode et al. (US 3886227).

Note Table III for unmodified polyolefins "E-115" and "E-117" as well as modified polyolefins "D-540" and 541 and note Table IV for blends of these materials as compositions A and B having improved tensile strength over either material.

Claims 50-65 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Mitsui Petrochemical (GB 1335791), cited by applicants in paragraph 5 of their published application.

Note Table 1 on page 4 of the patent where blends of modified and modified polyolefins in Examples 1 and 2 both have tensile strength of 240 Kg/square meter vs only 220 for the non blend composition.

When the reference discloses all the limitations of a claim except a property or function, and the Examiner cannot determine whether or not the reference inherently possesses properties which anticipate or render obvious the claimed invention, basis exists for shifting the burden of proof to applicant. Note In re Fitzgerald et al., 619 F. 2d 67, 70, 205 USPQ 594, 596, (CCPA 1980). See MPEP § 2112-2112.02.

Claims 50-65 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Van Brederode et al. (US 3966845).

Patentees disclose a composition in which the secant modulus and tensile strength are improved by adding grafted polyolefin (Abstract; column 2, lines1-6)Note Table II indicating that only a very small amount (i.e. 1%) may be added to improve flexural modulus and tensile strength and therefore the effect of adding the small amount of graft appears to be more than merely additive with respect to these characteristics.

When the reference discloses all the limitations of a claim except a property or function, and the Examiner cannot determine whether or not the reference inherently possesses properties which anticipate or render obvious the claimed invention, basis exists for shifting the burden of proof to applicant. Note In re Fitzgerald et al., 619 F. 2d 67, 70, 205 USPQ 594, 596, (CCPA 1980). See MPEP § 2112-2112.02.

Applicant's arguments filed 7-17-08 have been fully considered but they are not persuasive. Applicants claims as amended still recite improvements in characteristics by combining modified and unmodified polypropylene while paragraph 7 of applicants published specification discloses that such improvement is "entirely surprising" for the blending of modified and unmodified polyolefins, a process admitted by applicants to be old in the art (although not admitted of course that the improvement is old). Applicants disclose that the improvement is due to "judicious choice" of polypropylenes. As a "judicious choice" of polypropylenes is needed for applicants "unexpected" claimed results, it cannot be said that those skilled in the art would know what other polypropylenes would work in applicants process besides the tradenemed materials used.

With regard to the rejection under 35 USC 112 second paragraph, the term "low" is still in the claims.

Dings metal ion reacts with the graft copolymer to neutralize it (abstract) and can therefore be said to be part of the graft copolymer and as such a graft copolymer/polypropylene composition is being compared to a polypropylene composition such as in the instant claims. The terms "necessarily" and "possibility" referred to by applicants are used to mean that the inherent result must be inevitable, not the result of picking and choosing and selecting from various disclosures or making assumptions regarding operation such in Rosco where a result was postulated based on vacuum thermoforming despite the fact that no such process was specified. In the instant case the examiner has relied upon only specific examples and therefore the

issue of the inherent result not being necessarily present or the issue of possibilities or probabilities does not arise. The fact that in some cases the prior art does not explicitly teach or suggest applicants characteristics is immaterial since in all cases the addition of applicants materials to each other is disclosed explicitly and therefore it would reasonably appear that applicants characteristic is inherent. With regard to GB '791, it was and is the position of the examiner that example 1 reasonably appeared to possess applicants characteristics. Example 2 and the comparative example were any cited due to the fact that tensile strengths are explicitly disclosed for individual material used in example 1. None of the cited compositions containing polyamide although all are laminated to polyamide as can be seen by review of Example 1.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Jeffrey C. Mullis at telephone number 571 272 1075.
